TECHNICAL SKILLS

Mobile Application
- Native Android (Java & Kotlin, Jetpack Compose)
- Flutter — Mobile (Android & iOS)

Web Application
- Flutter — Web Application
- React JS — Web Application

Desktop Applicaiton
- Flutter — Desktop (Windows, Linux, Mac)

Cloud & Architecture
- Google Cloud Services,
- Firebase,
- Serverless Architecture,
- **Backend Integration:** Finarkin, ODS, Rowy, Strapi, GCP services

Backend
- Java (Spring Boot),
- REST API Desing,
- Python

Databases
- Hive Database,
- MongoDB
- PostgreSQL
- My SQL

AI - Assisted Dev
- Antigravity
- Claude(Anthropic),
- GitHup Copilot,
- ChatGPT,
- Google Gemini,
- Kiro(AWS AI Agent),

DevOps & Tools
- Git, GitHub,
- Jira,
- Jenkins(CI/CD)

UI/Design
- Figma
- Photopea

SUMMARY

Technical Lead with 8 years of comprehensive experience in designing, architecting, and delivering high-performance mobile ecosystems. Proven track record of leading engineering teams and managing the end-to-end development of complex "super apps" and B2B platforms. Highly proficient in driving technical strategy, establishing coding best practices, and leveraging applied AI knowledge to integrate advanced third-party SDKs, real time APIs, and AI conversational tools. Adept at bridging the gap between product vision and technical execution to deliver seamless, scalable, and secure user experiences.

CORE COMPETENCIES

- Mobile App Design/Development & UAT / Testing Artifacts
- AI Tools & Productivity (Claude,Antigravity, Kiro, Copilot, Gemini)
- Project Management Lifecycle
- Business Process Consulting & Incident/Change/Problem
- Solution Architecture
- Risk Assessment & Mitigation
- Cloud Computing and DevOps
- Business Analysis & Intelligence
- Client Relation & Stakeholder Management.

PROFESSIONAL EXPERIENCE

Technical Lead, *Impiger Technologies Pvt. Ltd*
10/2024 – Present | Chennai
Technologies: Flutter (Dart), React JS (Web) and Java(Spring Boot)

- **Led a 45+ member cross-platform engineering team** across Flutter, React JS, and Java Spring Boot for **ABCD (Aditya Birla Capital Digital)**, driving end-to-end delivery across architecture, development, deployment, production support, and client engagement.
- **Architected and delivered scalable Flutter applications** integrating UPI, Face Scan, Biometrics, GPS, Maps, and RESTful APIs, transforming complex business requirements into scalable architectures, technical designs, and production-ready solutions.
- **Drove engineering excellence and AI-powered development** by adopting GitHub Copilot, Claude, and Gemini to accelerate delivery, automate repetitive development activities, improve code quality, and enhance overall team productivity.
- **Owned technical strategy, code quality, release governance, and performance optimization**, collaborating with product, QA, DevOps, security, and business teams to resolve critical issues, ensure timely releases, and deliver secure, reliable, and high-performing applications.

Senior Software Engineer, *Bhumaha Solutions Pvt. Ltd*
09/2020 – 10/2024 | Chennai
Technologies: Flutter (Dart), Native Android (Core Java & Kotlin),Java (Spring Boot), REST APIs, Firebase, MongoDB, PostgreSQL, Keycloak, AI/Conversational AI, Payment Gateways, Google SDKs and Maps, SSO, Biometric Authentication.

LANGUAGES

English : Fluent

Tamil : Native

EDUCATION

Krishnasamy College Of Engineering and Technology,
B.Tech – Information Technology
2014 – 2018 | Cuddalore

AWARDS

Product Champion Award,
Bhumaha Solutions Pvt.Ltd
2024

- Honored for consistently exceeding client expectations, building scalable Flutter applications, and successfully developing AI-driven products.

- Delivered **8+ enterprise and consumer mobile applications** across FinTech, Insurance, B2B, E-Commerce, Social Networking, Food, and Global Trading domains using **Flutter**, supporting diverse client requirements and business workflows.
- Architected and integrated **payment gateways, UPI, Google Maps & SDKs, Firebase, biometric authentication, SSO/Keycloak, AI/Conversational AI, REST APIs, push notifications, and third-party enterprise services**.
- Developed complex features including **real-time chat, ERP integration, job portals, event management, dashboards, document management, location-based services, payment workflows, and customer/business data retrieval**.
- Collaborated with cross-functional teams and clients to translate business requirements into **scalable mobile solutions**, ensuring performance, security, maintainability, and seamless integration with backend Java/Spring Boot services.

Junior Software Engineer, *Tag Info Solutions India Pvt. Ltd*
11/2018 – 07/2020 | Chennai
Technologies: Android, Java, REST APIs, Firebase, PayU Money, QR Code, Third-Party SDKs.

- Developed and maintained **Android applications** across Education, Healthcare, and Transportation domains, integrating REST APIs, Firebase services, third-party SDKs, and backend systems.
- Developed **Healthcare and Medical Report applications** with QR code scanning, third-party library integrations, push notifications, and secure REST API connectivity.
- Developed an **Online Bus Ticket Booking application** with **PayU Money payment gateway integration**, dynamic UI components, and interactive promotional features.

PROJECT PORTFOLIO

ABCD Aditya Birla Capital
Play Store: https://play.google.com/store/apps/details?id=com.adityabirlacapitaldigital.OneApp

ABCD (Aditya Birla Capital Digital) is a large-scale, all-in-one fintech platform serving **10M+ users across India**, built with Flutter to provide a unified financial experience. The platform offers **UPI payments, investments across stocks, mutual funds and digital gold, loans, insurance, bill payments, and personalized financial insights**, enabling users to manage their financial needs through a single digital platform.

TATA AIA Siddhi
Play Store: https://play.google.com/store/apps/details?id=com.tataaia.siddhiapp

TATA AIA Siddhi is an insurance business management application that provides agents with **real-time access to policy and customer details, products, premiums, commissions, earnings, dashboards, leads, learning resources, and business updates**. The application includes **SSO, fingerprint authentication, calendar management, document handling, and WhatsApp, messaging, and email integrations**, enabling agents to efficiently manage their business activities from a single mobile platform.

BizcomAI
Play Store: https://play.google.com/store/apps/details?id=com.bhumaha.bizcomai

BizcomAI is a B2B end-to-end business automation platform powered by **Conversational AI**, enabling users to access and interact with enterprise data through an intuitive chat-based interface. The application integrates AI services with ERP systems to provide real-time insights into **work orders, invoices, customer details, and business information**, reducing manual effort and simplifying day-to-day business operations.

Go4WorldBusiness
Play Store: https://play.google.com/store/apps/details?id=app.go4worldbusiness.com

Go4WorldBusiness is a global B2B trading platform that connects **buyers and sellers** for seamless business transactions and product discovery. Developed Flutter-based frontend components and integrated them with **Java backend services and Firebase**, delivering a scalable and user-friendly cross-platform marketplace experience.

Foodwall
Play Store: https://play.google.com/store/apps/details?id=com.foodwallapp.android

Foodwall is a food-focused social platform that enables users to **discover restaurants, share food experiences, and post reviews**. Developed the Flutter frontend with Firebase integration to support a seamless and interactive user experience.

Flowsoft
Play Store: https://play.google.com/store/apps/details?id=com.bhumaha.flowsoftapp

Flowsoft is a business engagement platform designed to help enterprises streamline workflows and adapt to modern business requirements. The application provides a **chat-driven workflow**, enabling users to access business features and complete tasks through an intuitive mobile interface with minimal manual interaction.
